

# Installation Instructions

Take care when unpacking the logs as they are fragile. Please make sure you keep each log in its bag right up to the point of installation as this identifies the log numbers.

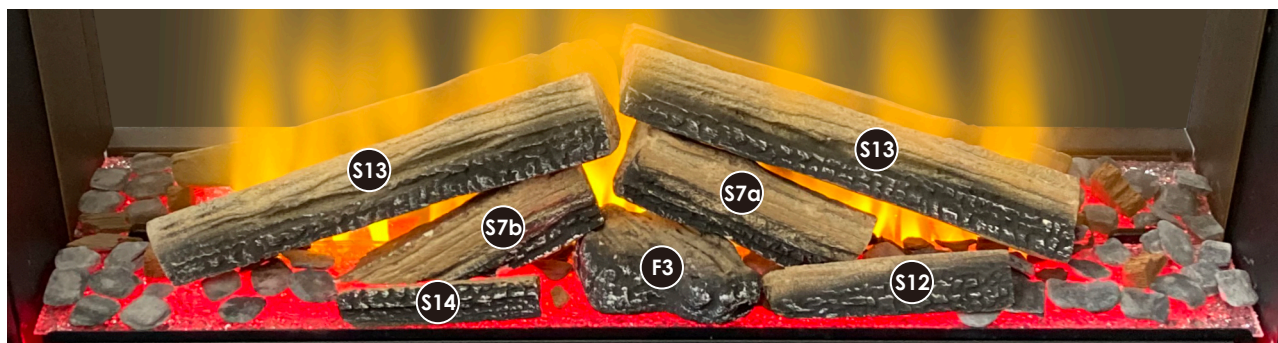

## Installation - Log Set Layout

Put provided logs and flakes (if required) onto the fuel bed.

**Please Note:** The images shown are suggested log layouts, the log sets can be arranged to personal preference.

## eTronic 560 Slimline Log Set Layout

Although the logs can be laid out in any manner to suit individual preferences we suggest the above layout is a good starting point. Lay logs in the following order.

**F3 in the centre back of the fire then the following in this order;**

**S7b, S7a, S14, S12, S13, S13.**

Once logs are in position, scatter crystals and flakes as desired.

## eTronic 800 Slimline Log Set Layout

Although the logs can be laid out in any manner to suit individual preferences we suggest the above layout is a good starting point. Lay logs in the following order.

**S2 in the back left of the fire, and F20 in the back right of the fire, then the following in this order;**

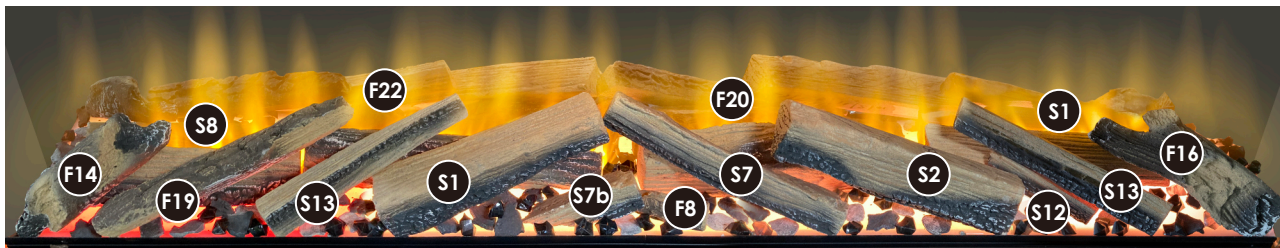

**F8 from centre to right, S8, S13, S12, S7, then S7b from centre to left, S14, S1, S12, S13.**

Once logs are in position, scatter crystals and flakes as desired.
